PRODUCT CATALOGUE

Zeiz (/zaiz/ ZYZ, German: [ˈtsaɪts]) means "gentle" in German. At Zeiz being gentle translates to being kind and understanding to Mother Earth and farmers.

In Zeiz brand terminology, the dandelion symbolises gentleness, optimism, growth and good luck, and that is why we have opted this messenger of hope and resilience to be one of our main brand symbols.

About the Brand

About Us

Zeiz is a British agriscience company who provides farmers with diverse and comprehensive agronomic solutions. Zeiz has been continually innovating and evolving to offer solutions and products in soil fertility, plant nutrition, and crop protection, ensuring the enhancement of agricultural productivity. We create and develop formulas tailored to farmers' needs with an already wide use spectrum.

At Zeiz, our agriscience experts and scientists use cutting-edge knowledge and field experience to help farmers around the world control risks and overcome challenges more effectively and efficiently, all the while knowing that their nurturing efforts will pay off in due course.

Our Vision & Mission

Our Vision: To design and create the most compatible and functional agronomic solutions and products, both aesthetically beautiful and scientifically effective, and to leave Earth better than we found it. The genuine satisfactory smile on farmers faces is all we crave and strive for.

Our Mission: We are committed to serving farmers to the best of our ability with our range of quality products and solutions.

Purpose

Our purpose is to serve farmers and the environment by any possible means while staying true to our core values. At Zeiz, we see and perceive serving people and the environment from a monk's perspective and realise this through down-to-earth steps for growth and sustainability.

Monks seek to leave a place cleaner and more jovial than they found it, and Mother Earth a happier one. This is what we seek and look to accomplish in Zeiz. This is our philosophy of existence.

"We see and perceive serving people and the environment from a monk's perspective."

Zeiz Story

Zeiz's story of success in the field of agriscience is a story of hope, a story of progress through the powerful hands of farmers, and a story of science in the service of farmers. We are seeding hope, seeding fertility.

Zeiz means “gentle” in German. At Zeiz being gentle translates to being kind and understanding to Mother Earth and farmers. Our ultimate goal of being gentle is to minimise or eliminate negative environmental impacts; to understand farmers' needs and struggles and to design products and solutions to address them.

MACRONUTRIENTS

MACRONUTRIENTS

Are essential for plant growth and a good overall state of the plant

There are three macronutrients that play a pivotal role in plant development: nitrogen (N), phosphorus (P) and potassium (K). These are often termed “primary macronutrients” because their availability is often managed with NPK fertilisers. In addition, there are “secondary macronutrients” which are required in less quantities compared to primary ones.

ZEIZ PRODUCTS

Growzeiz 10-52-10

MACRONUTRIENTS

Growzeiz 10-52-10 is a water-soluble fertiliser which contains nitrogen (10%), phosphorus (52%) and potassium (10%), as well as micronutrients, providing a high phosphorus formula for plants. This combination is intended to stimulate plant growth, fruit set and specially root development.

Composition

- Total Nitrogen (N): 10%
- Available Phosphorus (P_2O_5): 52%
- Soluble Potassium (K_2O): 10%
- Fe-EDTA: 0.005%
- Zn-EDTA: 0.1%
- Mn-EDTA: 0.005%
- Cu-EDTA: 0.005%
- Soluble Boron (B): 0.1%

POWDER/ 5 & 25 KG

Foliar

Fruit trees: 2-4 kg/1000 L water
Vegetables and other crops: 1.5-3 kg/ha

Fertigation

Fruit trees: 10-20 kg/ha
Vegetables and other crops: 5-10 kg/ha

ZEIZ PRODUCTS

Growzeiz 20-20-20

MACRONUTRIENTS

Growzeiz 20-20-20 is a water-soluble fertiliser which contains equal amounts of nitrogen (20%), phosphorus (20%) and potassium (20%), as well as micronutrients to provide a balanced formula for plants. This combination is intended to stimulate root development, plant growth and fruit set.

Composition

- Total Nitrogen (N): 20%
- Available Phosphorus (P_2O_5): 20%
- Soluble Potassium (K_2O): 20%
- Fe-EDTA: 0.02%
- Zn-EDTA: 0.1%
- Mn-EDTA: 0.01%
- Cu-EDTA: 0.01%

Growzeiz 18-18-18 + Ca

MACRONUTRIENTS

Growzeiz 18-18-18 + Ca is a water-soluble fertiliser which contains equal amounts of nitrogen (18%), phosphorus (18%) and potassium (18%), as well as calcium and micronutrients to provide a balanced formula for plants. The presence of calcium in this product improves the strength of cell walls during active cell division stages. This combination is intended to stimulate root development, plant growth and fruit set.

Composition

- Total Nitrogen (N): 18%
- Available Phosphorus (P_2O_5): 18%
- Soluble Potassium (K_2O): 18%
- Soluble Calcium (CaO): 6%

ZEIZ PRODUCTS

Growzeiz Unique

MACRONUTRIENTS

Growzeiz Unique is a harmonic blend of all necessary macro, secondary macro, and micronutrients, enriched with seaweed extract, amino acids, and fulvic acid, making it a perfect solution to meet all plant needs, especially through foliar application. Application of Growzeiz Unique leads to the correction of all nutrient deficiencies, enhancement of nutrient efficiency and crop quality traits, as well as alleviation of negative effects of biotic and abiotic stresses. It can be applied in all stages of plant growth from vegetative to generative stages.

Composition

- Macronutrients: (N: 10%, P₂O₅: 15%, K₂O: 20%)
- Secondary Macronutrients: (CaO: 2%, MgO: 1%)
- Micronutrients: (Fe EDTA: 0.5%, Mn EDTA: 0.36%, Zn EDTA: 0.24%, Cu EDTA: 0.12%)
- Soluble Boron (B): 0.2%
- Soluble Molybdenum (Mo): 0.1%
- Seaweed Extract: 5%

PLANT NUTRIENT CORRECTOR AND
GROWTH REGULATOR

ZEIZ PRODUCTS

ZeiziN CK
MACRONUTRIENTS

ZeiziN CK is a blend of potassium nitrate and calcium nitrate fertilisers that dissolves in water completely. It can be used throughout the season from the establishment to the productive stage. It provides nitrogen, potassium, and calcium to plants, enhancing yield and improving quality. Improving fruit size and colour, enhancing resistance to stresses, and increasing shelf life are primary functions of ZeiziN CK.

Composition

- Total Nitrogen: 12%
- Soluble Pottasium (K₂O): 18%
- Soluble Calcium (CaO): 18%

ZeiziN KMag

MACRONUTRIENTS

ZeiziN KMag is a crystalline fully water-soluble fertiliser based on potassium nitrate and magnesium nitrate. It is used to correct potassium and magnesium deficiency in soil and plants, and can be applied either via various irrigation systems (drip, sprinkler, centre pivot, etc.) or on leaves (foliar application). ZeiziN KMag is recommended as of vegetative growth and during production phases and contributes to the production of chlorophyll, leaf greenness and expansion, fruit development and colouring, and resistance to abiotic and biotic resistance.

Composition

- Total Nitrogen (N): 12%
- Soluble Pottasium (K₂O): 43%
- Soluble Magnesium (MgO): 2%

Macrozeiz

MACRONUTRIENTS

Macrozeiz is a liquid NPK fertiliser which is suited to a wide range of plants in any kind of plantation. Macrozeiz supplies three major macro nutrients that are crucial for both vegetation and bearing growth periods, as well as increasing plants' resistance against environmental stressors. The amino acids in Macrozeiz can improve appearance, quality, shelf life and fruit taste. Furthermore, it can enhance the crop's resistance to drought, salt damage, frost damage, sunburn, pests and diseases.

Composition

- Total Nitrogen (N): 19%
- Available Phosphorus (P_2O_5): 19%
- Soluble Potassium (K_2O): 19%
- Free Amino Acid: 6%
- Zn-EDTA: 0.1%

STRAIGHTS

Supply essential plant nutrients in the easiest way possible

Straight fertilisers are those which usually supply only one or two primary plant nutrients, namely nitrogen, phosphorus, potassium, calcium, etc., and which are based on urea, ammonium sulphate, potassium chloride, potassium nitrate, calcium nitrate, mono ammonium phosphate, etc. Straights are usually part of NPK or compound fertilisers, though they can be used separately as well.

ZEIZ PRODUCTS

Zeiz MAP

STRAIGHTS

As a highly efficient source of phosphorus and nitrogen for plants, Zeiz MAP is advised for utilisation at the onset of the growth season, while phosphorus attainability is vital for the establishment of the root system. Also, the presence of nitrogen contributes to early plant establishment and vegetative growth. This product can be tank-mixed with other fertilisers to meet crop nutritional needs during the growth cycle.

- Composition**
- Total Nitrogen (N): 12%
 - Available Phosphorus (P₂O₅): 61%

POWDER/ 25 KG

Foliar
Fruit trees: 2-5 kg/1000 L water
Vegetables and other crops: 2-5 kg/ha

Fertigation
Fruit trees: 20-30 kg/ha
Vegetables and other crops: 15-25 kg/ha

FERTILISERS

Zeiz MAP
MONOAMMONIUM PHOSPHATE

ZEIZ PRODUCTS

Zeiz UP
STRAIGHTS

Zeiz UP is a highly pure phosphate fertiliser with an acidifying capacity which dissolves rapidly and completely. This product is usually recommended during root and shoot development during early stages, specially in alkaline and calcareous soils. Because of low pH, Zeiz UP helps reduce bicarbonates in water, thus reducing the pH and enhancing the phosphate uptake by the plant during fertigation.

- Composition**
- Total Nitrogen (N): 17%
 - Available Phosphorus (P₂O₅): 44%

POWDER/ 25 KG

Foliar
Fruit trees: 2-5 kg/1000 L water
Vegetables and other crops: 2-5 kg/ha

Zeiz UP
UREA PHOSPHATE

ZEIZ PRODUCTS

Zeiz MKP STRAIGHTS

Zeiz MKP is a high purity fertiliser which dissolves rapidly and completely. As a nitrogen-free fertiliser, Zeiz MKP is the favoured source of phosphorus and potassium when nitrogen fertilisation should be restricted, for example, early in the growing season when phosphorus and potassium are required at high rates for the establishment of root systems. This product can be implemented in combination with other fertilisers to meet crop nutritional demand all through the growth cycle.

Composition

- Available Phosphorus (P_2O_5): 52%
- Soluble Potassium (K_2O): 34%

POWDER/ 25 KG

ZEIZ PRODUCTS

Zeiz SOP

STRAIGHTS

Zeiz SOP is a high purity potassium fertiliser, which dissolves rapidly and completely. This product is not sensitive to caking and is recommended during fruit or tuber development and up until maturation, and during the colouring of fruits. The high level of potassium in the formula plays an essential role in achieving higher quality yields. Zeiz SOP is readily available for plant uptake by providing concentrated nutrition. Also, it enhances the plant's resistance to drought, frost, insects and diseases, thus improving yield and quality.

Composition

- Soluble Potassium (K₂O): 52%
- Sulphur Trioxide (SO₃): 45%
- Sulphur (S): 18%

POWDER/ 25 KG

SULPHATE OF POTASH

ZEIZ PRODUCTS

Zeiz CN

STRAIGHTS

Zeiz CN is a granulated, hard and homogeneous calcium fertiliser. This product is recommended as of early spring until fruit setting and fruit development. The high level of calcium improves the strength of cell walls during active cell division stages. The presence of Nitrogen has a positive effect on the uptake of calcium in the plant. Zeiz CN improves fruit quality and can be used for dry spreading in open field crops or base and side dressing on different plants.

- Composition**
- Total Nitrogen (N): 15.5%
 - Soluble Calcium (CaO): 26%

POWDER/ 25 KG

CALCIUM NITRATE

ZEIZ PRODUCTS

Zeiz MgS

STRAIGHTS

Zeiz MgS is a high-quality fertiliser based on two secondary macronutrients, magnesium and sulphur which dissolves rapidly and completely in water. It is used to correct magnesium deficiency in the soil and in plants. As it is completely soluble in water, it can be applied either via different irrigation systems (drip, sprinkler, centre pivot, etc.) or on leaves (foliar application). Zeiz MgS is recommended as of vegetative growth and during production phases, and contributes to the production of chlorophyll, leaf greenness and expansion, as well as nitrogen and phosphorus uptake by plants.

Composition

- Soluble Magnesium (MgO): 16%
- Sulphur Trioxide (SO₃): 32%

POWDER/ 25 KG

Foliar

Zeiz ZnS

STRAIGHTS

Zeiz ZnS is a white crystalline free-flowing powder used to supply the required amount of zinc for any plantation. Zinc is one of the essential micronutrients and is required for the regulation of various metabolic activities, enzyme functions, ion transport, sugar synthesis, photosynthesis and nitrogen metabolism. Zeiz ZnS can be applied in the following manner: broadcast, basal, incorporated before planting, during seed treatment and as a foliar spray from early plant growth to flowering.

Composition

- Soluble Zinc (Zn): 34%

POWDER/ 25 KG

MICRONUTRIENTS

MICRONUTRIENTS

Play important roles in photosynthesis and in supporting plants at critical growth stages

Science has identified 17 essential nutrients for healthy plant growth. Of these, eight nutrients are required in smaller amounts (boron, chlorine, copper, iron, manganese, molybdenum, nickel and zinc), dubbed micronutrients, as well as several elements that have been identified as non-essential, yet beneficial such as cobalt, silicon, selenium, vanadium, etc.

Micronutrients are known to play many complex roles in plants development and health. Micronutrients promote the strong and steady growth of crops that produce higher yields and increase harvest quality, maximising a plant's genetic potential. In particular, their presence can have a great impact on root development, fruit setting and grain filling, seed viability and plant vigour and health.

ZEIZ PRODUCTS

Microzeiz

MICRONUTRIENTS

Microzeiz is a high-tech fertiliser which contains micronutrients chelated by free amino acids. Its amino acid acts as organic chelator and helps to supply trace elements including Fe, Mn, Zn, Cu, B and Mo. When chelated with amino acids, the trace elements can be absorbed more easily by plants, helping to promote chlorophyll formation, photosynthesis, blossom, fruit setting, etc. Microzeiz can be widely used as a micronutrient foliar fertiliser in combination with other water-soluble fertilisers and almost all commercial plant protection agents to enhance their efficacy.

Composition

- Total Amino Acid: 25%
- Free Amino Acid: 20%
- Total Nitrogen (N): 5%
- Chelated Fe: 4%
- Chelated Zn: 3.5%
- Chelated Mn: 1%
- Chelated Cu: 0.5%
- Soluble Boron (B): 2%
- Soluble Molybdenum (Mo): .0.05%

Molybdozeiz

MICRONUTRIENTS

Molybdozeiz is a water-soluble molybdenum corrector with nitrogen (N) and phosphorus (P_2O_5). The presence of phosphorus facilitates molybdenum absorption, which itself is essential in activation of two enzymes required for the nitrogen assimilation (nitrogenase and nitrate reductase). Molybdenum is important as it is related to the process of fruit setting. The most effective way is to apply Molybdozeiz via foliar application. The crops with the highest demand for this element are cucurbits, crucifers, legumes and some fruits, as well as some ornamentals.

Composition

- Total Nitrogen (N): 15%
- Available Phosphorus (P_2O_5): 5%
- Soluble Molybdenum (Mo): 10%

BIOSTIMULANTS

Biostimulants

Increase plant growth and resistance to biotic and abiotic stresses

Biostimulants (biostimulators) are a category of relatively new products with diverse formulations that positively affect a plant's vital processes, usually more evident under stressful conditions, by increasing a plant's tolerance to stresses and repairing damages caused by unfavourable conditions.

Biostimulants may be of natural or synthetic origin, and consist of various organic and inorganic components. Among naturally derived biostimulants are preparations based on free amino acids, organic acids, extracts from seaweed and fruit, effective microorganisms, humic substances and chitosan. Synthetic biostimulants are composed of plant growth regulators, phenolic compounds, inorganic salts, essential elements, and other substances that have stimulating properties for plants.

Biostimulants include various types of products that can stimulate plant growth and supply them with different nutrients. These products have been formulated by Zeiz, reaping the benefits of the latest scientific methods in the world.

ZEIZ PRODUCTS

Humizeiz

BIOSTIMULANTS

Humizeiz is a highly concentrated, water-soluble organic plant growth stimulant and soil conditioner based on potassium humate, processed from leonardite via a special extraction method. As a soil conditioner and organic fertiliser, it is particularly recommended in poor soil conditions to enhance cation exchange capacity and soil fertility. Moreover, Humizeiz increases nutrient use efficiency and has a stimulating effect on plant growth, root development and in increasing and stimulating beneficial soil microorganisms.

Composition

- Humic Acid: 65%
- Fulvic Acid: 8%
- Potassium (K₂O): 12%

Carbozeiz HSA 100

BIOSTIMULANTS

Carbozeiz HSA 100 is an organic powder fertiliser based on potassium humate, algae extract, and amino acids. The multi-functional comprehensive formula allows for all-round protection against a spectrum of abiotic and biotic stressors. It also enhances plant metabolic activity and improves soil biochemical activity. With high activated humic acid content, it stimulates root growth and nutrient uptake. The algae extract (*Ascophyllum nodosum*) acts as a metabolic enhancer and promotes the rapid development of plant tissue. Amino acids are taken up by the roots, and are the readily available building blocks for protein biosynthesis inside the plant. This saves energy for the plant, which it can utilise in other metabolic processes such as yield formation and abiotic stress compensation. Carbozeiz HSA 100 can be applied using fertigation, hydroponic, sprinkler systems, and through foliar application.

Composition

- Potassium Humate: 40%
- Seaweed Extract (*Ascophyllum nodosum*): 30%
- Amino Acid: 30%
- Organic Matter: 80%
- Organic Carbon: 46%

Peptizeiz

BIOSTIMULANTS

Peptizeiz is an organic fertiliser based on amino acids, peptide and taurine, so it functions like natural complexing agents and improves nutrient uptake from both the soil and foliar applications. It can be widely used as a foliar fertiliser in combination with other water-soluble fertilisers and with almost all commercial plant protection agents to enhance their efficiency.

Composition

- Free Amino Acid: 10%
- Peptide: 10%
- Seaweed Extract: 7 %
- Taurine: 3%

LIQUID AMINOPEPTIDE

ZEIZ PRODUCTS

Liquid Ascozeiz

BIOSTIMULANTS

Liquid Ascozeiz is a biotechnologically advanced biostimulant, based on *Ascophyllum nodosum* extract, developed to enhance the crop's quality. The molecule size is 100% absorbed by the plant; doing that, the plant reaction will be faster to the product virtues. It can also enhance the crop's resistance to drought, salt damage, frost damage, sunburn, pests and diseases. Moreover, it is widely used as a foliar fertiliser in combination with other products to improve their efficiency.

Composition

- Seaweed Extract: 25%
- Alginic Acid: 8%
- Total Nitrogen (N): 10%
- Soluble Potassium (K₂O): 3%
- Soluble Boron (B): 8%
- Soluble Zinc: 2%
- Mannitol: 1%

LIQUID/ 1 & 5 L

Algizeiz

BIOSTIMULANTS

Algizeiz is a liquid fertiliser derived from the seaweed extract, *Ecklonia maxima*. It supplies vast nutritional benefits and provides your plants with more than seventy minerals and vitamins. The manufacturing process, called the Cell-burst technique, produces a uniform and stable formulation which is highly bio-available for the plants to benefit from. Application of Algizeiz leads to an increase in overall root mass and surface area, faster seed germination and crop establishment, more and larger blooms in cut flowers, and improvement of firmness, shelf life, and colour of the fruits. In addition, Algizeiz increases water use efficiency and nutrient uptake, so, it contributes to forming a more resilient plant in drought conditions and a well-anchored one when facing wind or storm conditions, or pest and plant pathogen attack. Moreover, when it comes to soil application, Algizeiz acts as a soil amender and conditioner, thus providing a more productive and much healthier soil for plants to grow in.

Composition

- Seaweed Extract: 32%
- Soluble Potassium (K₂O): 1%

LIQUID/ 1 & 5 L

Foliar

Fruit trees: 2-3 L/ 1000 L water
Vegetables and other crops: 1-2 L/ha

Fertigation

Fruit trees: 2-4 L/ha
Vegetables and other crops: 1.5-3 L/ha

Algizeiz NP

BIOSTIMULANTS

Algizeiz NP is a liquid fertiliser derived from the seaweed extract, *Ecklonia maxima*, and enriched with nitrogen and potassium. It supplies vast nutritional benefits and provides your plants with more than seventy minerals and vitamins. The manufacturing process, called the Cellburst technique, produces a uniform and stable formulation which is highly bio-available for the plants to benefit from. Application of Algizeiz NP leads to the improvement of the appearance, quality, shelf life, and fruit taste, and can also increase plants' resistance against environmental stressors especially plant diseases and sunburn, as well as heat and cold stress. Application of Algizeiz NP is highly recommended from flower bud formation to fruit development and ripening.

Algizeiz PK

BIOSTIMULANTS

Algizeiz PK is a liquid fertiliser derived from the seaweed extract, *Ecklonia maxima*, and enriched with phosphorus and potassium. It supplies vast nutritional benefits and provides your plants with more than seventy minerals and vitamins. The manufacturing process, called the Cellburst technique, produces a uniform and stable formulation which is highly bio-available for the plants to benefit from. Application of Algizeiz PK leads to better development of the root system, increased resistance to stress (sunburn, heat, etc.), water use efficiency, improvement of firmness, shelf-life extension, and the colour enhancement of fruits and vigour in all plants. Application of Algizeiz PK is highly recommended from the beginning of seedling growth through to the fruit formation phase and maturity.

Composition

- Seaweed Extract: 32%
- Available Phosphorus (P_2O_5): 13.5%
- Soluble Potassium (K_2O): 7.5%

Algizeiz PZn

BIOSTIMULANTS

Algizeiz PZn is a liquid fertiliser derived from the seaweed extract, *Ecklonia maxima*, and enriched with phosphorus and zinc. It supplies vast nutritional benefits and brings more than seventy minerals and vitamins to your plants. The manufacturing process called the Cellburst technique, produces a uniform and stable formulation yet a highly bio-available one for the plants to benefit from. Application of Algizeiz PZn leads to an increase in overall root mass and surface area, faster seed germination, and better crop establishment, as well as water use efficiency. Application of Algizeiz PZn is highly recommended early at the seedling emergence or transplantation. It can also be applied as a seed treatment fertiliser.

Composition

- Seaweed Extract: 32%
- Total Nitrogen (N): 2%
- Available Phosphorus (P₂O₅): 13.5%
- Soluble Zinc (Zn): 3.5%

LIQUID/ 1 & 5 L

Algizeiz Micro

BIOSTIMULANTS

Algizeiz Micro is a liquid fertiliser derived from the seaweed extract, *Ecklonia maxima*, enriched with all the necessary trace elements. It supplies vast nutritional benefits and brings more than seventy minerals and vitamins to your plants. The manufacturing process called the Cellburst technique, produces a uniform and stable formulation yet a highly bio-available one for the plants to benefit from. Application of Algizeiz Micro leads to improved root system development, faster seed germination, and better crop establishment. On top of that, it can also increase the greenness of leaves, and improve fruit taste and colour. Algizeiz Micro can be applied through the whole vegetative and generative stages of the plants.

Composition

- Seaweed Extract: 32%
- Fe EDTA: 1%
- Mn EDTA: 1%
- Zn EDTA: 1%
- Cu EDTA: 0.6%
- Soluble Boron (B): 0.6%
- Soluble Molybdenum (Mo): 0.5%

Algizeiz CaB

BIOSTIMULANTS

Algizeiz CaB is a liquid fertiliser derived from the seaweed extract, *Ecklonia maxima*, and can supply a vast variety of nutritional benefits as well as more than seventy minerals and vitamins to your plants. The manufacturing process called the Cellburst technique, produces a uniform and stable formulation, yet a highly bio-available one for the plants to benefit from. Application of Algizeiz CaB leads to cell wall development and resistance, maintaining plasma membrane integrity, cell division, fruit and seed development, sugar transport and hormone development, and can improve the firmness, and shelf life of fruits. This product is recommended as of early spring until fruit setting, especially as of bud development prior to flowering.

CROP PROTECTANTS

Crop Protectants

Stimulate the defense system against biotic and abiotic stresses

This category includes some products that have dual purpose functions. These compounds can be used as fertilisers to supply some necessary elements for plants. They also have a protective effect against many biotic agents such as fungal diseases, insects, mites and abiotic stresses. For instance, phosphite provides a high side effect control against some fungal diseases. It stimulates the production of defense substances allowing the protection of biological induced resistance particularly against the phytophthora and downy mildew. In addition, some of these products can act as biostimulants stimulating plant growth. Among these products are included potassium phosphite, silicon fertilisers, sulphur and copper compounds.

ZEIZ PRODUCTS

Zeizite PK

CROP PROTECTANTS

Zeizite PK is a physiological inducer based on potassium phosphite with a double function over crops. On the one hand, it acts as a source of phosphorus and potassium. On the other hand, because of its contents in phosphorus as phosphite ion, it acts as a stimulant of plants' self-defence mechanisms, roots, neck, stems and fruits, against pathogenic fungi.

Composition

- Available Phosphite (P_2O_5): 45%
- Soluble Potassium (K_2O): 30%

LIQUID/ 1 & 5L

Foliar

Fruit Trees : 1-2 L/1000 L water
Vegetables and other Crops: 1-2 L/ha

Fertigation

Vegetables and other crops: 3-5 L/ha

FERTILISERS

Zeizite PK

POTASSIUM PHOSPHITE

ZEIZ PRODUCTS

Zeizite Cu

CROP PROTECTANTS

Zeizite Cu is a physiological inducer fertiliser based on potassium phosphite with a double function over crops. It provides the source of phosphorus and potassium, as well as copper. Furthermore, the phosphorus is presented as phosphite, which improves phytoalexins synthesis with anti-fungal properties by phosphite ion. As a kind of liquid fertiliser, copper participates in the chlorophyll synthesis, lignin synthesis and in the cellular respiration of the plants. So, the copper phosphite solution is used as bactericide, fungicide and antivirus for plant health.

Composition

- Available Phosphorus (P_2O_5): 52%
- Soluble Potassium (K_2O): 34%
- Cu EDTA: 5%

LIQUID/ 1 & 5L

PLANT GROWTH REGULATORS

Plant Growth Regulators

Are used to improve physiological processes and exponential growth to increase quality and quantity

Plant Growth Regulators (PGRs) are defined as small, simple chemicals produced naturally by plants to regulate their growth and development. Plant Growth Regulators are molecules that influence the development of plants and are generally active at very low concentrations. There are natural regulators which are produced by the plant itself and also synthetic regulators; those found naturally in plants called phytohormones or plant hormones.

Plant Growth Regulators can be of a diverse chemical composition, such as gases (ethylene), terpenes (gibberellic acid) or carotenoid derivatives (abscisic acid). Different hormones can be sorted into different classes, depending on their chemical structures. Within each class of hormone the exact structures vary, but they have similar physiological effects. Initial research into plant hormones identified five major classes: abscisic acids, auxins, cytokinins, ethylene and gibberellins.

ZEIZ PRODUCTS

Auxizeiz

PLANT GROWTH REGULATORS

Auxizeiz is a biostimulant containing a blend of Auxins that promote growth in plants. Auxizeiz incorporates two of the most common Auxins found in plants - Indole Acetic Acid (IAA) to encourage cell development and Naphthalene Acetic Acid (NAA) for improved root growth. Auxizeize also incorporates Thiamine to further enhance root development.

Composition

- NAA: 0.08 g/L
- IAA: 0.08 g/L

LIQUID/ 1 L

Foliar

ZEIZ PRODUCTS

Hormozeiz

PLANT GROWTH REGULATORS

Hormozeiz sets a new standard in yield-enhancing plant growth regulators. It has been registered as a plant biostimulant that has four growth hormone ingredients in a stable, patented formulation that promotes plant growth and optimises essential plant functions. It can be used early in-season with your herbicide, to improve stem strength or to increase branching. Use later in-season with your fungicide, to prevent the effects of heat blast and prolong flowering.

Composition

- Cytokinin: 0.009%
- Gibberellic Acid (GA): 0.005%
- Auxin (IBA and IAA): 0.01%

LIQUID/ 1L

Foliar

Fruit trees: 0.3-0.5 L/1000 L water
Vegetables and other crops: 0.3-0.5 L/ha

Become Our Sales Representative

As one of the leading agronomic solutions providers, we are determined to continue offering our expert help to growers and farmers in regions outside our current coverage, specifically the Middle East and North Africa, by providing them with our outstanding quality fertilisers and biostimulants and our enthusiastic, proactive support.

To this end, we welcome major and independent distributors who wish to expand their businesses by joining us to market, promote and sell the Zeiz family of products.
